

Angelo Breuer

.NET backend systems & connected devices

Heinsberg, Germany | info@angelobreuer.de | +49 176 3016 4105

github.com/angelobreuer | angelobreuer.de/cv

Freelance engineer building backend APIs, deployment infrastructure and device integrations for energy and real-time media products.

Freelance Software Engineer · Self-employed · Mar 2022 – present

EXPERIENCE

01 /
ENGAGEMENT

Apr 2024 –
present

Hosenso GmbH & Co. KG

Software Engineer

Energy and smart-building software across cloud services and connected devices.

- Built ASP.NET Core update APIs with package matching, PostgreSQL/EF Core, and tests.
- Implemented device JWT keys, persistent email codes, and trusted-device expiry/cleanup.
- Built CI pipelines and Helm deployments for .NET services and embedded software.
- Developed Matter, Modbus and OCPP integrations for connected devices.
- Built RP2040 PWM/digital I/O firmware, firmware loading, and embedded Linux bootloader changes.

ENGAGEMENT

2023

Piero Infinity Control

Software Engineer / Real-time Media

Developed C#/NET services with native C++ media components to connect RTSP cameras to WebRTC sessions for PieroControl.

- Implemented audio/video session negotiation and keep-alives, plus SIP call integration, in a Linux-targeted media service.
- Added Basic/Digest authentication handling and automated protocol and authentication tests.

Angelo is easily one of the brightest software engineers I have ever met. He has helped our company Piero Infinity Control develop key software infrastructure services, always delivering elegant solutions using industry best practices. I highly recommend him to anyone looking for assistance in software development.

Samir Zattar · CTO of Piero Infinity Control

SOURCE

2019 - 2026

Lavalink4NET

Lead contributor

Implemented clustering and reconnection strategies for a .NET audio library; maintained releases and regression tests.

Estimated reach: 250 Discord bots, 165,000 servers and 6.5 million unique users.

200,000+ cumulative downloads of the core NuGet package

- Built node clustering and configurable reconnection with exponential backoff, including tests for reconnect timing.
- Added regression coverage for track encoding and queue behavior; maintained compatibility and NuGet releases.

C# · .NET · Async APIs · Clustering · Regression tests

2021 - 2024

localtunnel.net

Creator

Created a .NET tunnelling client as a CLI and reusable library, with configurable HTTP processing and connection inspection.

135 GitHub stars

- Implemented WebSocket forwarding alongside HTTP tunnelling, so applications can expose persistent connections as well as ordinary requests.
- Handled host-header rewriting, query-string forwarding and TCP keep-alives; exposed request tracing for inspecting connections.

C# · HTTP / WebSockets · Kestrel · CLI tooling

EXPERTISE

Backend development: C# / .NET · ASP.NET Core APIs · PostgreSQL / EF Core · JWT / device authentication

Quality & delivery: Unit & regression tests · Async APIs / reconnection · CI/CD · Kubernetes / Helm

Device integration: Embedded Linux · C / C++ / RP2040 · Matter / Modbus / OCPP · RTSP / WebRTC

EDUCATION

Fontys International Business School

Sep 2023 – present

BBA, International Business (in progress). Expected graduation: 2027 (estimated).

Berufskolleg Wirtschaft, Geilenkirchen

2020 – 2023

Allgemeine Hochschulreife, computer science focus

Earlier experience: CSB System AG: internships and part-time work, 2018–2019.
